

Mr. Apoorva Kumar
Founder & CEO, 'Dissect AI'
Alumnus of B.Tech. (IT) IIIT Allahabad

Apoorva Kumar is the Founder and CEO of Dissect AI, an AI governance platform powered by 500 Global and backed by top VCs in EU/UK. The company helps enterprise IT teams add governance and oversight to agentic AI applications, a capability that has become a deciding factor in closing enterprise AI deals.

Kumar cut his teeth as a software engineer across SAP's global ecosystem, rising through architecture and product leadership roles before landing senior management positions at three of the world's most influential technology companies — SAP, Amazon Web Services, and Microsoft. At AWS, he helped scale the execution environment for AWS Lambda and gave sign off for the launch of AarogyaSetu (built on Lambda).

At Microsoft, he led product teams across Microsoft Teams and SharePoint premium, steering AI, compliance, and identity capabilities into products used by millions, while also serving as Microsoft Team's Global Patent Lead.

He is also an angel investor With HoaQ, a community backing founders building for Africa and its diaspora, and co-Invested alongside Sequala in Baseline, which was later acquired by Cloudflare.

Kumar holds several patents in the US and EU. He has been recognized as a SAP Top Talent Fellow and also received Microsoft patent Award. He speaks regularly at tech events and conferences about entrepreneurship and AI. Based between Dublin and the San Francisco Bay Area, Kumar's career reflects a shift from building products inside large technology companies to founding companies focused on the infrastructure, AI systems will need to operate safely at scale.
